To: All Operators of Bauer/JMAR and Jordair Breathing Air Compressors

Jordair is the exclusive Canadian Agent for Bauer Kompressoren GmbH for the Sales, Assembly and Service of breathing air systems with Bauer compressor blocks. Please refer to the Bauer "Authorization Letter" dated April 03, 2006 in accordance with the CSA standard for breathing air.

Jordair as an accredited ISO 9001-2000 company and follows the recommendations of CSA Standard CAN/CSA Z180.1-00 for Breathing Air to insure the highest degree of safety and reliability in all Jordair/Bauer breathing air systems.

The following is the Jordair Compressors Inc. policy and factory requirements for authorized service technicians, which became effective May 1st 2002.

Only Jordair Compressors Inc. factory trained service technicians holding current training certificates are authorized by Jordair to work on Jordair, Bauer or JMAR compressor systems operating in Canada.

Jordair technical service representatives are required to participate in a refresher course every 2-year's in order to have a valid certificate.

Any unauthorized service of Jordair/Bauer breathing air systems will result in a void of any and all warranty. See the Bauer "Authorization Letter".

Any compressor system using a Bauer block and assembled in Canada other than by Jordair Compressors Inc. is void of any and all Jordair and Bauer Kompressoren GmbH. factory warranty.

The implementation of factory recommended service intervals as per CSA:

CSA Standard Clause 5.7 "The installation, inspection, testing, operation, maintenance, and repair of components of a compressed breathing air system shall be performed as specified by the manufacturers of the components of the compressed breathing air system".

The proper service of these ultra-high pressure systems will ensure operator safety, compressor reliability and the highest quality of breathing air. In order to comply with the current CSA standard the compressor system must be checked and serviced at regular intervals by factory certified technicians as specified in the CSA standard.

CSA Standard Clause 7.1 General, “Air compressors shall be installed, maintained, and operated in accordance with the manufacturer’s instructions”.

As the manufacturer and Exclusive Canadian Agent for Bauer Kompressoren GmbH., Jordair has implemented the following procedures for the safe operation and qualified technical service of the breathing air products supplied.

All Jordair/Bauer/JMAR compressor systems producing breathing air except with a Securus Moisture Monitor are to have the purification cartridges changed every 6-month even if the life span of the cartridge in operating hours has not been reached.

Purification systems supplied with a Securus Moisture Monitor can be operated beyond six months and up to one year or until the yellow warning light comes on, which ever come first.

To guarantee air purity standards and warrantee requirements only original Jordair or Bauer purification cartridges will be used in the Jordair/Bauer/JMAR breathing air systems.

The compressor system will be checked once a year for pressure leaks and the minimum service will include a filter and oil change.

Only Jordair factory certified technicians with current certificates are authorized to service Jordair/Bauer/JMAR systems in Canada.

For any further clarification in this regards contact:
